

3D A-Frame House

You have 3 choices :

Bird House

2 Seasons Cottage(2 houses back to back)

Nativity Scene

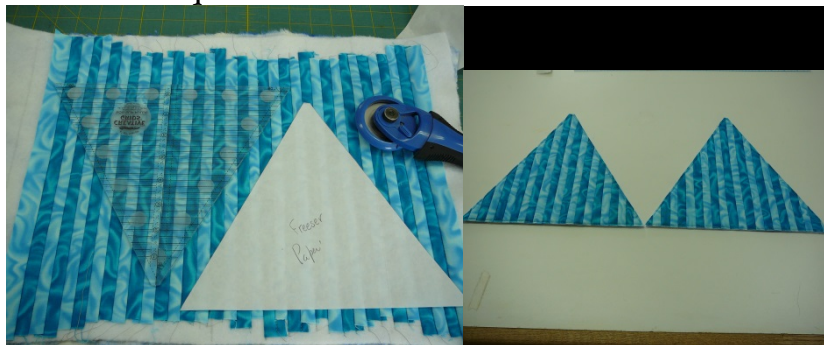

If you want to finish, or almost finish the project in a day and not be stressed about the pace, I encourage you to do some preparation before coming to class.

For the Birdhouse

Step 1

You will need to piece and quilt the front and back triangular shaped walls. You can copy what I did, which is a "quilt as you go" piecing with 1" strips. Position them vertically to mimic planks. I suggest that you sandwich a rectangle of backing, cover with a piece of batting the same size, big enough to put the 2 triangles 1 upward the other downward and you quilt as you go with your strips of fabric , 1 light , 1 dark until the sandwich is covered and quilted .

You can also use your imagination to prepare the walls as you wish respecting the triangular shape and size.

Do not make the round door yet. I will explain that part during the workshop , put the walls aside.

Step 2

Making the roof: you will need to piece and quilt 2 rectangles that will create the roof, For each side of the roof you will need to piece 2, 4½" blocks, stitch together , plus a border of 1". The finished size of the rectangles is 5½" x 9½" refer to the pattern for more info , make a small sandwich of each side and quilt it as you wish .

Any kind of 4½" bloc will work , if you prefer to use my pattern it was made with the paper piecing technique , I suggest that you print 2 patterns that I have sent you and prepare 4 paper piecing patterns for the 4 blocks you need .

You will discover the rest of the technique the day of your class.
Don't forget the rest of your supplies.
